COLUMBUS WASH DRAINAGE IMPROVEMENTS

CLOSURE OF BELVEDERE AVENUE AT SENECA STREET

Dear Neighbor,

Clear Contracting has been contracted by the City of Tucson to complete the Columbus Wash Drainage Improvement Project which includes:

Improving the drainage on Catalina Avenue and Belvedere Avenue by installing a new underground drainage system between these two streets and utility improvements (sewer and water) at various locations on Catalina Avenue, Belvedere Avenue, and Lester Street.

The following work will occur during the school holiday break sometime between Thursday, December 29 and Friday, January 6. Watch for advance warning signs to alert you to the start of construction.

- **Crews will be installing a large drainage grate in Belvedere, just south of Seneca. The grate extends from curb to curb and the work will take approximately one week to complete. Because of the depth of the excavation, a closure of Belvedere will be necessary. Only motorists living in the work zone will be able to access this section of Belvedere and workers may direct you through the closure.**
- **Driveways will not be permanently blocked at any time. However, residents living south of the closure should enter Belvedere from the south (Waverly Street or Linden Street) in order to get to your driveways. Access may change as the work continues**
- **Motorists traveling northbound or southbound on Belvedere should consider Waverly Street and Catalina Avenue to avoid the closure. Work will still be underway at Catalina Avenue and Lester Street so motorists will experience restrictions in that area. Please drive with caution in the work areas.**
- **Your utility service (water, sewer, electricity) will not be affected.**
- **Unforeseen conditions or inclement weather could extend the work.**

We appreciate your patience during this work. If you have any questions about this project, please call Nanette Pageau at (520) 885-9009 or Chris Hoey at Clear Contracting at (520) 784-8433.
