## **COLUMBUS WASH DRAINAGE IMPROVEMENTS**

Dear Neighbor,

Clear Contracting and the City are working to complete the drainage improvements on your street and in the surrounding area.

Work is underway on the underground box culvert in Belvedere at the east end of Lester Street. The Catalina Avenue and Lester Street intersection is back open for your access onto Lester and into your driveways. This work will take approximately 2-3 weeks.

While the work described above is underway, Clear Contracting crews will begin working on the underground drainage that will be built down the center of Lester Street to the west. This work will begin on Tuesday, January 31<sup>st</sup> and will take approximately 3 weeks.

- Workers will be moving west from Belvedere, a little at a time, down the middle of Lester, digging a trench where the drainage structure will be installed.
- Donnie, the on-site manager and Chris the project manager will be working to provide each of you access to and from your driveways. This access will change and there may be short periods of time when your access may be closed.
- The crews will continue to work with the mail person and the garbage trucks as they have in the past.

If you are concerned about access to your driveway for scheduled appointments or work hours, please talk with the workers in the field or call Chris Hoey, the Project Manager at 520-784-8433. They will assist you.

The City of Tucson and Clear Contracting continue to thank you for your understanding and patience. We understand how challenging it has been to live next to this work and we thank you.

If you have any questions about this project, please call Santiago Lozano, the City's project manager at 520- 780-8853 or Chris Hoey at Clear Contracting at (520)784-8433.
