Mobility Vitality Sustainability

# Drainage Improvements

## Extending the Existing Storm Drain System Where Feasible

The Grant Road Improvement Plan is a transportation project that will address drainage as it applies to roadway improvements. While the Plan cannot resolve all the flooding issues that exist in this area, it will expand the existing storm drain system where feasible and add some drainage system enhancements at points along the roadway.

- Legend**
- Major Drainage Network
  - - - Major Drainage Feature
  - At-Grade Cross Drainage
  - Offsite Catchment
  - Existing Drainage Infrastructure
  - Future Pavement Storm Drain System
  - FEMA 100-yr Floodplain
  - Passive Water Harvesting
