

Summary

Glenn Heights Neighborhood Conversation, January 14, 2008

Concerns:

- During the five years of construction, how will I get downtown from my home?
- Continuity of pedestrian walkways.
- Flood season during construction (remember Alvernon Way).
- Business Parking? Will parking be put behind the businesses? What will happen? This is not good for business. Small businesses on Pima could not survive this.
- The center median width should be able to incorporate future transit options (ex. a light rail).
- Bus pullouts/bus lane.
- A lot of businesses are already closing.
- Construction effects small businesses. Many will not survive.
